

SFDR
Classification:
Article 8 Fund

Investment Aim

To generate a return reflective of the risk profile of the fund and to incorporate environmental, social and governance characteristics.

Sustainable Finance Disclosure Classification: Article 8 Fund

Article 8 or Light Green Funds promote environmental or social characteristics (although not exclusively) and invest in companies that follow good governance practices. Please read the separately available document 'How SSGA assesses the environmental, social and governance ("ESG") profile of issuers'. This is available [here](#) or from your Wealth Advisor.

Overview

PRIME Equities aims to generate returns reflective of the risk profile of the fund by investing in a range of passive funds.

How PRIME Equities Aims To Achieve Returns:

- ▶ **PRIME Equities** offers investors access to the return potential that can come from exposure to equities*. **PRIME Equities** provides exposure to developed market, small-cap global and emerging market equities. The developed market and emerging market exposures of **PRIME Equities** incorporate ESG features. See [here](#) (page 2) for more information. Exposure to the different types of equities offers the potential for the higher returns that equities can deliver. It is important to understand that exposure to a single asset class increases the risk of the investment. Any fall in the value of equities will impact on the value of your investment as the value of equities can fall as well as rise significantly at times, the impact could be significant.
- ▶ **Passive investment approach** – **PRIME Equities** invests in a range of equity funds which adopt a passive investment strategy. This is one that tracks market weighted indices or portfolios rather than relying on a fund manager to select specific assets to invest in.
- ▶ **PRIME Equities** has been classified on Bank of Ireland Life's 7 point risk scale as a **high risk** fund: See [page 4](#) for more information.

Warning: The value of your investment may go down as well as up.

Warning: Past performance is not a reliable guide to future performance.

Warning: This fund may be affected by changes in currency exchange rates.

Warning: If you invest in this fund you may lose some or all of the money you invest.

The investment manager may use the equity assets that PRIME Equities has exposure to for the purpose of securities lending in order to earn an additional return for the fund. While securities lending increases the level of risk within a fund it provides an opportunity to increase the investment return.

PRIME Equities' Strategic Asset Class Exposure

Details of the SSGA passive funds that PRIME Equities invests in are below:

Asset Class	SSGA Passive Funds
Equity Exposure	<p>PRIME Equities aims to share in the performance of global stock markets through exposure to developed market, global small-cap and emerging market equities passive funds.</p> <p>State Street World ESG Index Equity Fund – aims to track the performance of the MSCI World ESG Universal Index, as closely as possible over the long-term. This index measures the performance of global developed equity market securities, with the allocation to securities re-weighted using certain ESG metrics to tilt the index exposure towards securities demonstrating both a robust ESG profile and a positive trend in improving that ESG profile. The index excludes stocks that do not have an ESG rating, have an ESG Controversy Score of 0 (ESG Red Flag Companies) and Controversial Weapons businesses.</p> <p>SPDR® MSCI World Small-cap UCITS ETF – aims to track the performance of small sized companies in developed equity markets globally.</p> <p>State Street Global Emerging Markets Screened Index Equity Fund – aims to provide investors with exposure to a diversified portfolio of emerging market equities, diversified across regions, industry sectors and stocks. The screens now are as follows: Arctic Drilling, Civilian Firearms, Controversial Weapons, Extreme ESG Controversies, Nuclear Weapons, Oil Sands, Thermal Coal, Tobacco, UN Global Compact Violators. The fund also applies ESG tilting and exclusions as explained on page 3.</p>

The SSGA funds listed above are as at September 2024 but may change over time.

To find out more about how ESG is incorporated into **PRIME Equities'** building blocks, [see page 3](#).

To find out more about our ESG commitment visit our

Sustainable Investing Hub

Review of the Underlying Building Blocks – reviews of all **PRIME Funds** and the underlying SSGA funds are undertaken regularly; funds and asset classes may be added/removed over time in line with the aim of each **PRIME Fund**.

PRIME Equities Summary

PRIME Equities has exposure to developed market, small-cap global and emerging market equities and cash.

Exposure to developed market, small-cap global and emerging market equities is set. This is reviewed annually.

SSGA – Our Passive Investment Partner

SSGA has a proud heritage of passive investing. With over four decades experience, they have provided high quality passive funds that can help lower costs and allow investors to keep more of what their portfolios earn over time.

As one of the world's largest managers of passive assets, SSGA offer a huge selection of funds — covering a multitude of asset classes, markets and regions.

ESG at SSGA

SSGA's mission is to invest responsibly to enable economic prosperity and social progress. SSGA believe that identifying and systematically incorporating material ESG issues is integral to their role as fiduciaries of investors' capital. As one of the world's largest asset managers, SSGA offer global expertise in ESG research, investment strategy and data analytics.

Signatory to UN Principles of Responsible Investing (PRI) Since[†]: 3 May 2012

How PRIME Equities incorporates ESG

**SFDR
Classification:
Article 8 Fund**

As mentioned **PRIME Equities** uses exclusions, tilting and asset stewardship to promote environmental and social objectives as well as promote good governance.

Exclusions are when a fund does not have exposure to certain sectors or stocks at all based on environmental or social reasons.

- ▶ For instance, the developed market and emerging market equity funds do not invest in controversial weapons or companies that have violated the UN Global Compact; an internationally accepted minimum set of standards relating to the areas of human rights, labour, environment and anti-corruption.

Tilting is an ESG technique that is often used in addition to exclusions. It seeks to maintain the same characteristics as the standard index that the fund is tracking (such as country and sector exposures), but rewards higher performing ESG companies with more capital, and allocates less capital to companies with lower ESG scores.

- ▶ This approach is applied in the State Street World ESG Index Equity Fund.

Asset stewardship or active ownership, as it is often referred to, is a critical ESG tool. As one of the world's largest asset managers, SSGA engages with companies' board of directors and senior management team on key ESG issues SSGA want them to address. This can range from gender and racial equality, their climate strategy or governance structures.

Warning: The value of your investment may go down as well as up.

Warning: Past performance is not a reliable guide to future performance.

Warning: This fund may be affected by changes in currency exchange rates.

Warning: If you invest in this fund you may lose some or all of the money you invest.

[†]In 2005, the United Nations established a body that developed the Principles for Responsible Investing ("PRI"). The Principles for Responsible Investment are a set of six principles that set a global standard for responsible investing.

Minimum Recommended Investment Period

Investing should be considered over the medium to long-term (at least 5-7 years) so as to reduce the risk of short-term market volatility. However, even long-term investing involves risk as values will fluctuate over time.

Risk Rating – High Risk

At Bank of Ireland Life we classify our wide range of funds into seven different risk categories to help you better understand the risks to your original investment.

Separately European Union (EU) law requires that a risk indicator be applied to funds if certain products are held (excludes pensions), and it may differ from the Bank of Ireland Life risk category. The EU indicator is stated in the Fund Information Sheets and can be found on our website at fundcentre.bankofireland.com/KIDS. Please see the Smart Funds or Target Saver brochure for further details

Bank of Ireland Life has rated **PRIME Equities** a high risk investment fund. High risk funds have the following characteristics:

- ▶ The potential return from high risk investments is much higher than deposits or inflation.
- ▶ The focus is on maximising the potential return to investors rather than minimising risks.
- ▶ Some high risk funds may consist almost entirely of one asset class or be concentrated in one geographic region or sector.
- ▶ Investors' capital is not secure and may fluctuate significantly. Investors may get back substantially less than they originally invested.

Key Fund Risks

Market risk (value can fluctuate in line with market movements), **single asset class risk** (exposure to just one asset type) and **currency risk** (exposure to changes in currency exchange rates) are risks that arise from investing in this fund that investors should be aware of.

As the fund has exposure to non-euro assets, this brings additional risk of how changes in currency exchange rates can impact the value of the fund. The investment manager may, from time to time, use derivatives to reduce the foreign currency risk of this fund. For more information on these and other types of risks that may apply, please see our "Investing & Risk" document available from your Wealth Advisor.

Warning: The value of your investment may go down as well as up.

Warning: Past performance is not a reliable guide to future performance.

Warning: This fund may be affected by changes in currency exchange rates.

Warning: If you invest in this fund you may lose some or all of the money you invest.

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name: PRIME Equities
Legal entity identifier: N/A

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

☒ ☒ ☐ Yes

☒ ☐ ☒ No

☐ It will make a minimum of **sustainable investments with an environmental objective:**

☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ It will make a minimum of **sustainable investments with a social objective:**

☐ It **promotes Environmental/Social (E/S) characteristics** and while it does not have as its objective a sustainable investment, it will have a minimum proportion of % of sustainable investments

☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ with a social objective

☒ It promotes E/S characteristics, but **will not make any sustainable investments**

What environmental and/or social characteristics are promoted by this financial product?

PRIME Equities (the “**Account**”) is a multi-asset portfolio aiming to deliver long-term capital growth. The Account allocates a portion of its assets to funds that promote environmental and / or social characteristics by employing ESG screening, ESG integration or track an ESG index with environmental and social characteristics.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?

The asset allocation of the Account to funds that promote environmental and / or social characteristics is used to measure the attainment of the environmental or social characteristics of the Account.

The strategic fund allocation with environmental or social characteristics is currently 89.5%. This relates to developed market and emerging market equity exposure.

The Account also has exposure to global small-cap equities but there is no environmental and social characteristics associated with this asset class exposure.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

- **What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?**

N/A

- **How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?**

N/A

- **How have the indicators for adverse impacts on sustainability factors been taken into account?**

N/A

- **How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

N/A

Does this financial product consider principal adverse impacts on sustainability factors?

☐ Yes

☒ No

What investment strategy does this financial product follow?

PRIME Equities aims to generate returns reflective of the risk profile of the fund by predominantly investing in a range of passive funds. PRIME Equities adopts a passive investment approach - this is an investment strategy the Account can adopt that tracks market weighted indices or portfolios rather than relying on a fund manager to make investment decisions. PRIME Equities is, in general, a passively managed fund.

The investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

- **What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?**

The binding element of the investment strategy is 89.5% to underlying funds that promote environmental and / or social characteristics.

- **What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?**

N/A

- **What is the policy to assess good governance practices of the investee companies?**

Asset stewardship, or active ownership, is an ESG tool utilised to promote good governance practices. The Investment Manager engages with companies' board of directors and senior management team on key Environmental, Social and Governance issues that they want them to address. This can range from gender and racial equality, their climate strategy or governance structures.

Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.

Asset allocation describes the share of investments in specific assets.

What is the asset allocation planned for this financial product?

The Account is a multi-asset portfolio aiming to deliver long-term capital growth. Asset allocation is reflective of the risk profile of the fund.

81.5%	Developed Market Equities**
9.5%	Global Small-Cap Equities
9.0%	Emerging Market Equities**

**Article 8 Funds

The splits shown represent PRIME Equities' strategic asset class allocations as at September 2024. From time to time, the actual splits will differ on the basis of cash flow and dynamic risk adjustments.

This asset allocation includes to underlying funds that promote environmental and / or social characteristics. The strategic fund allocation with environmental or social characteristics is currently 89.5%. This relates to developed market and emerging market equity exposure (#1). The Account also has exposure to global small-cap equities but there are no environmental and social characteristics associated with this asset class exposure (#2).

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product (variable weight).

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

● How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?

N/A.

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

N/A

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-aligned of investments including sovereign bonds*

■ Taxonomy aligned (0%)
■ Other investments (100%)

2. Taxonomy-alignment of investments excluding sovereign bonds*

■ Taxonomy aligned (0%)
■ Other investments (100%)

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

- **What is the minimum share of investments in transitional and enabling activities?**

N/A

- **What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?**

N/A

- **What is the minimum share of socially sustainable investments?**

N/A

- **What investments are included under “#2 Other”, what is their purpose and are there any minimum environmental or social safeguards?**

In accordance with the objective of long-term capital growth, the Account may hold a portion of its assets in cash, cash equivalents and underlying funds that do not promote environmental and / or social characteristics which would be classified as #2 Other. Such assets will not be aligned with environmental and social characteristics nor will there be any environmental or social safeguards associated with such assets in place.

- **Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?**

No

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- **How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?**

N/A

- **How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?**

N/A

- **How does the designated index differ from a relevant broad market index?**

N/A

- **Where can the methodology used for the calculation of the designated index be found?**

N/A

- **Where can I find more product specific information online?**

More product-specific information can be found on the website:
